

# Enhancing University of Florida's Institutional Repository with Elsevier's ScienceDirect API Services

A pilot project to explore how publishers and universities can work together to make their databases and repositories interoperable, reducing duplication of effort and ensuring funding body and publisher compliance.

## About

### Elsevier's ScienceDirect API Services:

- Deliver complete and accurate metadata incl. embargo end dates
- Link users to best available version based on their IP address
- Embed PDF or link out to the final article on ScienceDirect
